- Supplies for our subjects are COLOR specific. This is done in order to help our students become and stay organized throughout the year. We encourage students to get their supplies early in order to obtain the correct colors.
- Students will receive assignment books/planners and a homework folder the first week of school.
- Students may need to replenish worn out and/or lost supplies throughout the year.

****Students should have division/multiplication flashcards, or they may be substituted with any app or your existing IXL.com account that will help the student to have **ALL of their basic addition, subtraction, multiplication, and division facts mastered****

BEFORE entering fourth grade. They will need to continue to use these throughout the year to retain knowledge of math facts. 😊
